River and Steamboat News.

ABBIVED. March 28.- J. G. Cline, Memphis. Tempest. Louisville.

> DEPARTED. J. G. Cline, Memphis. Tempest, Louisville.

The river is falling with 64 feet water of

the Shoals. The Cuba departs to-day for Paducah where she connects with packets for St. Louis,

Memphis and L misville.

THE Minnesota is literally the central head of inland navigation on this continent. No other State enjoys such facilities A slight rise of ground, and a few miles of distance are all that separate rivers flowing to different extremes of North America. You can take one route and sail uninterruptedly down the Mississippi to the Gulf of Mexico. You can take another route and sail through the Great Lakes and Canal to New York. You can take a third route and sail through the Northern lakes and rivers to the Arctic ocean. You can take a fouth route and sail to the head waters of the Saskatchewan, and thence, after a short portage to the head waters of the Columbia, sail on down to the Pacific Ocean. You can take a fifth route by way of the Peace river, and another portage

down to Puget's Sound. "Ox teams" are the present means of mak ing the connection between these different lines of inland navigation. But it will not be long before it is made by short canals or silways, and then Minnesota will enjoy falities of shipping her products, and choosng her markets that are enjoyed by no other aland country in the world.

POLYGAMY IN UTAH .- A Salt Lake correspondent of the Chicago Press and Tribune. who has been getting up the statistics of Utah Territory, writes that "three hundred and eighty-seven men in this Territory live each with seven women and upwards, (thirteen of the three hundred and eighty-seven having each over nineteen women who bear children by them,) seven hundred and thirty men have each five women who live with them and bear children by them; eleven bundred men each live with four women and upwards; and from the last estimate I have been able to make, fourteen hundred men each live with more than one woman - Seven men have mother and daughter for wives one man living within a thousand yards of the flag staff at Camp Floyd, one the mother of the other, and both will, with good lock, in a few weeks, be delivered of children by him."

DECLINE OF WHEAT GROWING .- At a late meeting of the Pennsylvania Agricultural Society. Dr. Atwix called attention to the interesting fact that there was a decline in the yield of wheat, to the acre, in the grain growing States. In Ohio, a State but little over fifty years old, the crop had fallen off from forty bu hels to the acre to about sixteen; while in the best poctions of New York. where thirty bush Is used to be considered a fair crop, only twelve bush is are now raised. The falling off in other States has been equally marked; but while this was to fact with the wheat crops, he was glad to know that the amount of corn produc d to the acre, had largely increased, and was still increasing enormously.

Iff" The Clarkev He Chronicle of 25th inst., says " the grading on the first thirty indes of our railroad, is rapidly approaching completion. The iron, we understand, will be here in about two weeks-when the track laying will commence, at the river, and continge in the direction of the Kentucky line. The Clarksville Chronicle of the 25th says : " We learn that there was a severe hail storm, round about Graysville, on Tuesday evening last. The bail stones are said to have be n as large as hen's eggs. We have not heard of any damage done by it."
